Sommario/riassunto	Television is no longer the only screen delivering footage and news to people about sport. Computers, the Internet, Web, mobile and other digital media are increasingly important technologies in the production and consumption of sports media. Sport Beyond Television analyzes the changes that have given rise to this situation, combining theoretical insights with original evidence collected through extensive research and interviews with people working in the media and sport industries. It locates sports media as a pivotal component in online content economies and cultures, and counte
