   Edizione   [2nd ed.]

   Descrizione fisica   1 online resource (706 p.)

   Disciplina   616.8/0475

   Soggetti   Brain - Diseases - Diagnosis
                        Electroencephalography

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Rev. ed. of: Teaching atlas of brain imaging / Nancy J. Fischbein, William P. Dillon, A. James Barkovich. 2000.

   Nota di bibliografia Includes bibliographical references and index.

   Sommario/riassunto   Case-Based Brain Imaging, Second Edition, an update of the highly regarded Teaching Atlas of Brain Imaging, has full coverage of the latest technological advancements in brain imaging. It contains more than 150 cases that provide detailed discussion of the pathology, treatment, and prognosis of common and rare brain diseases, congenital/developmental malformations, cranial nerves, and more. This comprehensive case-based review of brain imaging will help radiologists, neurologists, and neurosurgeons in their training and daily practice.   Key Features: * More than 1, 000 updated high-resolution images created on state-of-the-art equipment * Advanced CT and MR imaging introduces readers to current imaging modalities * Pathological descriptions of radiologic diagnoses help clarify the pathophysiology of the disease * Pearls and pitfalls of imaging interpretation for quick reference * Authors are world-renowned brain imaging experts Radiology residents, neuroradiology fellows preparing for board exams, and beginning practitioners will find this book an

invaluable tool in learning how to correctly diagnose common and rare pathologies of the brain.
