Sommario/riassunto

The IATBR conference proceedings series has a history of over 30 years and is widely read by researchers, practitioners and graduate students in the field of transportation and urban planning in general, and in travel behaviour analysis in particular. It is the only series of conference proceedings that comprehensively reviews, synthesizes, and identifies research needs and future research directions for the respective sub areas of the travel behaviour research field and presents up-to-date, state-of-the-art assessments by distinguished authors. This volume of the 11th International Conference
