| Sommario/riassunto | This book examines how membership of the European Union has affected life in the ten former communist countries of Eastern Europe that are now members of the European Union. For each country, political, economic and social changes are described and discussed, together with people's perceptions of the effects of EU membership. Overall, the book shows how the benefits of EU membership have differed between different countries, and how perceptions about the benefits also differ and have changed over time. |
