Sommario/riassunto	The African manufacturing sector continues to face many problems as it struggles to progress from its presently underdeveloped state. If the

countries that make up Africa are ever to raise the living standards of the vast majority of its population to a more acceptable level, then the economic growth that would result from an enlarged and improved manufacturing sector may hold an important key. The book provides a useful source of greater understanding of African manufacturing firms and the perplexing lack of widespread industrial growth during the post-colonial decades. The comprehensive c
