

1. Record Nr.	UNINA9910966937303321
Titolo	Biometrics : theory, applications, and issues // Ellen R. Nichols, editor
Pubbl/distr/stampa	New York, : Nova Science Publishers, 2011
ISBN	1-61761-143-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (191 p.)
Collana	Nova biomedical Biotechnology in agriculture, industry and medicine series
Altri autori (Persone)	NicholsEllen R
Disciplina	570.1/5195
Soggetti	Biometry Biometric identification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Sample size requirements for evaluating intervention effects in three-level cluster randomized clinical trials / Moonseong Heo, Mimi Y. Kim -- A modified locally linear discriminant embedding for tumor classification / Shanwen Zhang, Deshuang Huang, Bo Li -- Fusion approach for improving the performance in voice biometrics / Di Liu ... [et al.] -- Fusion of lighting insensitive approaches for illumination robust face recognition / Loris Nanni, Sheryl Brahmam, Alessandra Lumini -- A two-part generalized linear mixed modelling approach to analyze physical activity outcomes / Andy H. Lee, Liming Xiang, Fumi Hirayama -- Biometric identification paradigm : towards privacy and confidentiality protection / Julien Bringer ... [et al.].
Sommario/riassunto	Discusses the problem of finding a face recognition system that works well both under variable illumination conditions and under strictly controlled acquisition conditions. This title explores information fusion techniques that have been widely developed in the community of voice biometrics.
