| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | pt. 1. Terrorism -- pt. 2. Torture and ticking time-bombs -- pt. 3. Torture and the real world. |
| Sommario/riassunto | The general consensus among philosophers is that the use of torture is never justified. In <i>Terrorism, Ticking Time-Bombs, and Torture</i> , Fritz Allhoff demonstrates the weakness of the case against torture; while allowing that torture constitutes a moral wrong, he nevertheless argues that, in exceptional cases, it represents the lesser of two evils. Allhoff does not take this position lightly. He begins by examining the way terrorism challenges traditional norms, discussing the morality of various practices of torture, and critically exploring the infamous ticking time-bomb scenario. After carefully considering these issues from a purely philosophical perspective, he turns to the empirical ramifications of his arguments, addressing criticisms of torture and analyzing the impact its adoption could have on democracy, institutional structures, and foreign policy. The crucial questions of how to justly authorize torture and how to set limits on its use make up the final section of this timely, provocative, and carefully argued book. |

| Sommario/riassunto | When Egypt became a province of the Roman Empire in 30 B.C. after the deaths of Antony and Cleopatra, its vast and mysterious frontier lands had an important impact on the commerce, politics, and culture of the empire. This engrossing book-part history and part gazetteer-focuses on Rome's Egyptian frontier, describing the ancient fortresses, temples, settlements, quarries, and aqueducts scattered throughout the region and conveying a vivid sense of what life was like for its inhabitants. Robert B. Jackson has journeyed, by jeep and on foot, to |

virtually every known Roman site in the area, from Siwa Oasis, forty-five kilometers from the modern Libyan border, to the Sudan. Drawing on both archaeological and historical information, he discusses these sites, explaining how Rome extracted exotic stone and precious metals from the mountains of the Eastern Desert, channeled the wealth of India and East Africa through the desert via ports on the Red Sea, constructed and manned fortresses in the distant oases of the Western Desert, and facilitated the expansion of agricultural communities in the desert that eventually experienced the earliest large-scale conversions to Christianity in Egypt. Elegantly written and illustrated with many handsome photographs, the book will be a treasured resource for archaeologists, classicists, and travelers to the region.
