

1. Record Nr.	UNINA9910966993303321
Titolo	Mineral biotechnology : microbial aspects of mineral beneficiation, metal extraction, and environmental control / / edited by S.K. Kawatra and K.A. Natarajan
Pubbl/distr/stampa	Littleton, Colo., : Society for Mining, Metallurgy, and Exploration, c2001
ISBN	1-68015-379-X 0-87335-378-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (273 p.)
Altri autori (Persone)	KawatraS. K NatarajanK. A., Prof
Disciplina	622/.7
Soggetti	Bacterial leaching
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Biobeneficiation -- section 2. Bioleaching -- section 3. Bioremediation -- section 4. Biomineralization.
Sommario/riassunto	Microorganisms can play a beneficial role in all facets of minerals processing, from mining to waste disposal and management. The commercial practice of biohydrometallurgical metal extraction occurs all over the world. Mineral Biotechnology provides the technical knowledge necessary to compete in this arena by presenting specific, detailed technologies and real-world case studies.
