

1. Record Nr.	UNINA9910967012203321
Autore	Sundaram Ramya
Titolo	Portraits of Labor Market Exclusion // Sundaram, Ramya
Pubbl/distr/stampa	Washington, D.C., : The World Bank, , 2015
ISBN	9781464805424 1464805423
Edizione	[1st ed.]
Descrizione fisica	1 online resource (290 pages)
Collana	Directions in Development : Human Development
Disciplina	658.3
Soggetti	Personnel management - Research Sustainable development - Planning Europe, Eastern Social policy Eastern Europe
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>""Front Cover""; ""Contents""; ""Acknowledgments""; ""About the Authors""; ""Abbreviations""; ""Chapter 1 Introduction""; ""Why and What""; ""Note""; ""Chapter 2 Portraits of Labor Market Exclusion""; ""General Economic Background""; ""Stylized Issues Emerging from the Analysis""; ""Selected Issues for Further Policy Dialogue""; ""Broader Policy Issues""; ""Notes""; ""References""; ""Chapter 3 Latent Class Analysis of the Out-of-Work Population in Bulgaria, 2007-11""; ""Background""; ""Methodology: Latent Class Analysis""; ""Main Findings""; ""From Profiling to Activation""; ""Notes""; ""References""; ""Chapter 4 Latent Class Analysis of the Out-of-Work Population in Estonia, 2007-11""; ""Background""; ""Methodology: Latent Class Analysis""; ""Main Findings""; ""From Profiling to Activation""; ""Notes""; ""References""; ""Chapter 5 Latent Class Analysis of the Out-of-Work Population in Greece, 2007-11""; ""Background""; ""Methodology: Latent Class Analysis""; ""Main Findings""; ""From Profiling to Activation""; ""Notes""; ""References""; ""Chapter 6 Latent Class Analysis of the Out-of-Work Population in Hungary, 2007-11""; ""Background""; ""Methodology: Latent Class Analysis""; ""Main Findings""; ""From Profiling to Activation""; ""Notes""; ""References""; ""Chapter 7 Latent</p>

## Sommario/riassunto

"Portraits of Labor Market Exclusion presents ""profiles"" or ""portraits"" of individuals who have limited labor-market attachment. It is widely accepted that those with limited attachment to the labor market are a highly heterogeneous group (including, for instance, recent job losers, long-term unemployed, school leavers with no labor-market experience, those close to retirement age, or people with caring responsibilities), and that understanding their circumstances and potential barriers is an essential prerequisite for designing and implementing a tailored and effective mix of policy support and incentives. The report takes a comprehensive view, focusing on both the labor market attachment of a country's out-of-work population and the social assistance package and poverty profile of the same segment of the population. In essence, the report looks at individuals through the lenses of both poverty/welfare status and labor market indicators, and, in doing so, the portraits helps move the dialogue from a purely labor market-centric view to a broader dialogue that includes social policy as a whole. This is an important shift; for instance, social protection programs, such as family benefits and maternity benefits, and broader social policy issues such as retirement ages, often have a great impact on who remains inactive. Specifically, the report presents portraits of the out-of-work population of six countries (Bulgaria, Estonia, Greece, Hungary, Lithuania and Romania) in terms of distance from the labor market, human capital, and labor supply conditions, as well as demographic conditions. The analysis relies on the European Union Statistics of Income and Living Conditions (EU-SILC) surveys for the years 2007 to 2011. Latent class analysis methodology allows multidimensional profiling of the out-of-work population, and identifies classes or groups of out-of-work individuals that are as homogeneous as possible within each class according to a set of observable characteristics, and as distant as possible between classes. Consequently, this analysis provide a much richer glimpse of the very different barriers to labor market integration that these various groups experience, considerably augmenting the limited amount of information contained in traditional descriptive statistics."
