Edizione	[1st ed.]
Descrizione fisica	1 online resource (340 p.)
Collana	Land reconstruction and management series ; ; v. 4
Disciplina	631.4/5
Soggetti	Soil conservation Soil productivity Land use, Rural - Planning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [268]-309) and index.
Nota di contenuto	Front Cover; Preface; Contents; Chapter 1. Introduction to Better Land Husbandry; Chapter 2. Social and Economic Components of Better Land Husbandry; Chapter 3. Agro-ecological Components of Better Land Husbandry; Chapter 4. Better Land Husbandry:A New Paradigm; Chapter 5. Better Land Husbandry in Practice; Chapter 6. Better Land Husbandry and Policy; APPENDIX 1. Impact Monitoring and Assessment; REFERENCES; Index; Back Cover
Sommario/riassunto	This book is a timely contribution towards the debate on the most effective way to bring about sustainable farming in marginal areas. It offers a detailed analysis of the social, economic, and agro-ecological characteristic of both Soil and Water Conservation (SWC) and Better Land Husbandry (BLH) and an analysis of case studies of BLH from Central and South America, Africa, and Asia.
