| Sommario/riassunto | Liberal Socialism exposes false ideas of justice behind neo-liberal capitalism and combines Rawls' ideas on justice and Marx's views on capitalism to make a plausible case for the alternative social ideal of liberal socialism. A fixed social structure gives equal weight to all competing claims for rights, liberties, and shares of the burdens and benefits of social cooperation, while allowing a democratic majority vote for liberal socialism. |

Recent research in the fields of attachment and trauma is once more pointing to the contribution of early relational failures to extreme psychic suffering. 'Disorganised' patterns of attachment, identified in children whose caregivers are simultaneously a source of fear and a source of comfort, have been linked to the development of both dissociative and so called 'borderline' disorders in adult life. The conference was to bring together speakers able to extend our thinking and bring insights from attachment theory and psychoanalysis to the current debate about the links between the traumatic disorganisation of attachment relationships and more severe mental and emotional distress - dissociative states, borderline experiences and psychosis - as they emerge in clinical practice. The papers in this volume have in common a committed insistence upon placing human relationship at the centre of their accounts of extreme psychological suffering, both as the source of injury and, most hopefully, as the potential agent of repair. In this respect, they contribute fittingly in his centenary year to the continuation and extension of John Bowlby's pioneering work for the understanding, treatment and relief of such suffering.
