Sommario/riassunto	Aesthetics and Painting introduces and opens up current debates and ideas in the aesthetics of painting. At the book's center is an investigation of the complex relationship between what a painting depicts and the means by which it is depicted. The book looks at: how and why painting may be distinguished from other art forms; the relationship between the painted surface and the depicted subject; the "rules of representation" specific to painting; abstract art and nonrepresentational painting; the most recent technological and aesthetic developments and their implications; the role of the artist- and that of the spectator. A sophisticated treatment of major ideas in art and philosophy, Aesthetics and Painting remains highly readable

throughout, offering a clear and coherent account of the nature of painting as an art form
