

1. Record Nr.	UNINA9910967585503321
Titolo	Marine phytoplankton // William T. Kersey and Samuel P. Munger, editors
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2009
ISBN	1-61470-212-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (398 p.)
Collana	Oceanography and ocean engineering series
Altri autori (Persone)	KerseyWilliam T MungerSamuel P
Disciplina	579.8/1776
Soggetti	Marine phytoplankton
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- MARINE PHYTOPLANKTON -- CONTENTS -- PREFACE -- MICROPHYTOBENTHOS -- ABSTRACT -- INTRODUCTION -- STRUCTURE OF MICROPHYTOBENTHOS: TAXONOMY AND DIVERSITY -- SEASONAL AND SPATIAL VARIABILITY -- METHODS AND METHODOLOGICAL PROBLEMS RELATED TO THE STUDY OF MICROPHYTOBENTHOS -- PRIMARY PRODUCTION OF MICROPHYTOBENTHOS: IMPORTANCE OF MICROPHYTOBENTHOS ON COASTAL TROPHIC NETS -- INFLUENCE OF MICROPHYTOBENTHOS ON SEDIMENT DYNAMICS -- ECOTOXICOLOGY OF MICROPHYTOBENTHOS -- FURTHER STUDIES -- ACKNOWLEDGMENTS -- REFERENCES -- NEAR BOTTOM PHYTOPLANKTON AND SESTON: IMPORTANCE IN THE PELAGIC-BENTHIC COUPLING PROCESSES -- ABSTRACT -- 1. INTRODUCTION: BASIC CONCEPTS AND COMPONENTS -- 2. THE COMPLEXITY OF NEAR BOTTOM WATER LAYERS -- 2.1. Competence for Light and Nutrients -- 2.2. The Importance of High Frequency Sampling -- 2.3. The Temporary Component of Phytoplankton: Resting Stages and Cysts -- 3. DIFFERENT HABITATS, DIFFERENT FEATURES -- 3.1. Warm Temperate Seas -- 3.2. Cold Temperate Seas -- 3.3. Tidal Flats -- 3.4. Fjords -- 3.5. Tropical Seas -- 3.6. Polar Seas -- 3.7. The Deep Sea -- 4. BENTHIC ORGANISMS FEEDING ON NEAR BOTTOM PHYTOPLANKTON AND SESTON -- 5.1. Feeding Strategies and Phytoplankton Depletion -- 5.2. Absorption and Assimilation of Phytoplankton by the Benthic Suspension Feeders -- 5.3. Benthic-Pelagic Coupling and Food

Availability -- 5.4. The Nutrient Return to the System -- 5.5.
Seasonality -- 6. CONCLUSION -- REFERENCES -- SLOW-DOWN OF
OCEANIC CO₂ UPTAKE IN RESPONSE TO GLOBAL WARMING -- ABSTRACT
-- 1. INTRODUCTION -- 2. MODEL AND EXPERIMENTAL SETUP -- 3.
METHODS -- 4. RESULTS -- 4.1. CO₂ Fluxes -- 4.1.1. Global CO₂
Fluxes -- 4.1.2. CO₂ Flux Patterns -- 4.1.3. Regional CO₂ Fluxes --
4.1.3.1. Response to Emissions and Climate Change -- 4.1.3.2.
Response to Climate Change -- 4.2. CO₂ Flux Determining Properties
-- 4.2.1. Solubility.
4.2.2. Gas Transfer Velocity -- 4.2.3. Oceanic Partial Pressure and
Atmosphere-Ocean Partial Pressure Difference -- 4.2.4. Fluxes Induced
by Solubility, K_w And PCO₂ Changes -- 4. 3. CO₂ Transport Out of
the Surface Layer -- 4.3.1. Maximum Mixed Layer Depth -- 4.3.2.
North Atlantic Meridional Overturning Circulation (MOC) and
Antarctic Circumpolar Current (ACC) -- 4.3.3. Export -- 5. DISCUSSION
-- 5.1. Southern Ocean (35° and 60° S) -- 5.2. North Atlantic -- 5.3.
Arctic and Southern Ocean South of 60°S -- 5.4. Equatorial Oceans and
Low-Latitude Atlantic -- 6. CONCLUSION -- ACKNOWLEDGMENTS --
REFERENCES -- MYCOSPORINE-LIKE AMINOACIDS IN PHYTOPLANKTON:
BIOCHEMISTRY, PHYSIOLOGY AND OPTICS -- ABSTRACT --
INTRODUCTION -- BIOCHEMISTRY AND PATHWAYS OF SYNTHESIS FOR
MYCOSPORINE-LIKE AMINO ACIDS -- PHYSIOLOGICAL RESPONSES OF
MYCOSPORINE-LIKE AMINO ACIDS TO ENVIRONMENTAL CONDITIONS --
INDUCTION OF MAAs BY PAR AND UV-R -- MAAs AND NUTRIENT
UPTAKE: HOW ARE THEY RELATED TO PHOTOPROTECTION? --
Sunscreen Efficiency of MAAs as Photoprotective Compounds: How
Well Do MAAs Shade Vulnerable Organelles? -- SPECTRAL WEIGHTING

Sommario/riassunto

Phytoplankton are microscopic plants that live in the ocean. Phytoplankton obtain energy through a process called photosynthesis and must therefore live in the well-lit surface layer of an ocean, sea, lake or other body of water. This book provides current research on this very important marine plant species.
