Sommario/riassunto

The environments in which people live out their later lives have a strong impact on their identity and provide opportunities for nourishing social interactions. This volume translates the insights derived from contemporary research on residential environments and public spaces that enhance well-being into practical recommendations for the design of such beneficial community environments. The text is grounded in the conceptual and theoretical underpinnings of current research on place attachment, environmental meaning, and community living in later life. Emphasis is placed on how to design resi

Sommario/riassunto	Islam, Judaism, and Christianity are engaged not in a 'clash of civilizations' but in a sectarian conflict among branches of a single civilization traditionally steeped in apocalyptic imagery and beliefs. Apocalypticism is a religious luxury that modern civilizations can no longer afford. Many would agree that the propagandists of the Christian Right have raised apocalyptic tensions to a dangerous level since 9/11, but in this book Fenn takes on the main line church leaders for their role in promoting an apocalyptic view of history.
