Sommario/riassunto	The communication protocol described by IEEE Std 1149.1 TM -2001 (Standard Test Access Port and Boundary-Scan Architecture) has been adopted by this standard for providing standardized programming access and methodology for programmable integrated circuit devices. Devices that implement this standard will first be compliant with IEEE Std 1149.1-2001, which is used for testing purposes. A device, or set of devices, implementing this standard can be programmed (written), read back, erased, and verified, singly or concurrently, with a standardized set of resources. Sample implementation and application details (which are not part of this standard) are included for illustrative purposes.

Sommario/riassunto	<p>Iran: The Nuclear Challenge maps the objectives, tools, and strategies for dealing with one of the most vexing issues facing the United States and global community today. The book brings together leading experts- CFR's Elliott Abrams, Robert D. Blackwill, Robert M. Danin, Richard A. Falkenrath, Matthew Kroenig, Meghan L. O'Sullivan, and Ray Takeyh-on the issues and contingencies surrounding Iran's nuclear program, including sanctions, negotiations, U.S. and Israeli military options, regime change, and how to deal with a latent or actual Iranian nuclear weapons capability. This volume presents one of the clearest pictures of Iran's nuclear program to date, along with the various policy options available to the United States and others and their potential consequences.</p>
