| Nota di contenuto | Fetal alcohol spectrum disorders : an overview / Kieran D. O'Malley --
Infant, toddler and young child systems of care for patients with fetal alcohol spectrum disorders (FASD) and their families / Kieran D. O'Malley --
Sensory integration and sensory processing disorders / Tracy Jirikowic --
Pathophysiology of ADHD in patients with ADHD and fetal alcohol spectrum disorders : the role of medication / Kieran D. O'Malley --
The role of therapeutic intervention in substance abusing |

mothers : preventing FASD in the next generation / Therese Grant ... [et al.] -- Neuropsychological profiles of children and adolescents with fetal alcohol spectrum disorders and ADHD / Donald S. Massey and Valerie J. Massey --
Adult neuropsychology of fetal alcohol spectrum disorders / Kathy Page -- Sexually inappropriate behavior in patients with fetal alcohol spectrum disorders / Natalie Novick-Brown -- Identifying and treating social communication deficits in school-age children with fetal alcohol spectrum disorders / Truman E. Coggins, GERALYN R. TIMLER and Lesley B. Olswang -- FASD and ADHD : the nuts and bolts of diagnosis and treatment in the real world / Phil Matthei -- Multi-modal management strategies through the lifespan / Kieran D. O'Malley -- Fetal alcohol spectrum disorders (FASD) in the adult : vulnerability, disability, or diagnosis- a psychodynamic perspective / Arthur K. Sullivan.

Sommario/riassunto

This multi-author book will discuss the history and clinical presentation of Fetal Alcohol Spectrum Disorders (FASD) i.e Fetal Alcohol Syndrome (FAS) and Alcohol Related Neurodevelopmental Disorder (ARND). These developmental neuropsychiatric disorders result from prenatal exposure to alcohol during any gestational period of pregnancy. The book will particularly address the co-occurring presence of ADHD in patients with FASD. ADHD is the most frequent neuropsychiatric presentation of FASD throughout the lifespan and it is particularly difficult to manage because the underlying pathophysiology is related to prenatal neurotoxic brain injury. Although prenatal alcohol exposure, and the resulting FASD, is recognized as the commonest preventable cause of intellectual disability, many clinicians and educators are not aware that 75 to 80% of the patients with FASD have I.Q.s over 70. Thus, the neuropsychiatric presentation of FASD can often be unrecognized or misunderstood. FASD are the true clinical 'masqueraders' and ADHD is their most likely disguise. The authors are all experienced professionals from a wide range of disciplines working throughout the USA and Canada. They have been involved in the diagnosis, research and management of FASD for many years and this book will bring their collective knowledge regarding management from infancy to adulthood to an inter-professional audience.
