

1. Record Nr.	UNISA996198095803316
Titolo	Journal of hydrologic engineering // American Society of Civil Engineers, Water Resources Engineering Division
Pubbl/distr/stampa	New York, NY, : American Society of Civil Engineers
ISSN	1943-5584
Disciplina	627
Soggetti	Hydrology Hydraulic engineering Hydrology - Periodicals Hydraulic engineering - Periodicals Hydrologie - Périodiques Technologie hydraulique - Périodiques Hydrologie Technologie hydraulique Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed Published: Reston, VA, <Jan. 2000->

2. Record Nr.	UNINA9910967790803321
Autore	Markos A. R
Titolo	Sexually transmitted diseases // A.R. Markos
Pubbl/distr/stampa	New York, : Nova Biomedical Books, c2009
ISBN	1-61209-388-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (212 p.)
Collana	Disorders of the lower genito urinary tract series
Disciplina	616.95/1
Soggetti	Sexually transmitted diseases Communicable diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The common organisms causing sexually transmitted infections -- The principles of managing patients with STIs -- The human papilloma virus (HPV) infections and genital warts -- Molluscum contagiosum -- Chlamydia trachomatis genital infections -- Gonorrhoea -- Non-specific urethritis -- Muco-purulent cervicitis -- Pelvic inflammatory disease -- Prostatitis -- Epididymo-orchitis -- The herpes simplex virus and herpes genitalis -- Bacterial vaginosis -- Vulvo-vaginal candidiasis (VVC) -- Trichomoniasis -- Pediculosis -- Scabies -- Sexually transmitted viral hepatitis -- Tropical sexually transmitted infections -- Sexually acquired reactive arthritis (SARA) -- Syphilis -- Endemic treponematoses -- The human immuno deficiency virus (HIV) and acquired immuno deficiency syndrome (AIDS).
Sommario/riassunto	The worldwide prevalence of sexually transmitted infections (STIs) is a cause of concern for the public and health organisations. Young age of sexual debut, breakdown of relationships, travel, mobility, relationship explorations, social instability, between other socio-economic factors, contribute to the loss monogamous sexual relationships. The resultant multiplicity of sexual relationships predispose to STIs. The Sexually Transmitted Infections book provides an overall practical account for the benefit of generalists and Primary Care physicians, who would encounter the patients' problems first. The emphasis on clinical issues, drawing from the author's 30 years of progressive clinical experience in Primary Care, Urology, Obstetrics and Gynaecology and Venereology,

share expertise with those intending to specialise. Patients who wish to acquire unbiased in depth knowledge about sexually transmitted infections, will find answers to their questions. Many of these questions were asked times and times again by patients who shared similar concerns and anxieties. The book covers a wide range of clinical practices and facilities and addresses areas of low resource settings, which will make the account relevant to developing primary health units.
