

1. Record Nr.	UNINA9910967836603321
Autore	Schroder Martin <1954->
Titolo	Molecular chaperones of the endoplasmic reticulum / / Martin Schroder
Pubbl/distr/stampa	New York, : Nova Science Publishers, Inc., c2010
ISBN	1-61668-459-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (136 p.)
Collana	Protein science and engineering
Disciplina	571.6/5
Soggetti	Molecular chaperones Endoplasmic reticulum
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [71]-119) and index.
Nota di contenuto	Physicochemical principles governing protein folding -- The ER -- Molecular chaperones of the ER.
Sommario/riassunto	An important function of the endoplasmic reticulum is the folding of newly synthesised polypeptide chains. Several general and specialized chaperones operate in the endoplasmic reticulum to assist protein folding. This book reviews our current knowledge of molecular chaperones of the ER.
