

1. Record Nr.	UNINA9910967837803321
Titolo	Glaucoma : etiology, pathogenesis and treatments // Z.G. Fei and Seiji Zeng, editors
Pubbl/distr/stampa	Hauppauge, N.Y. : , : Nova Science Publishers, , 2012
ISBN	1-62100-094-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (176 pages) : illustrations
Collana	Eye and vision research developments
Altri autori (Persone)	FeiZ. G ZengSeiji
Disciplina	617.7/41
Soggetti	Glaucoma Glaucoma - Treatment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Nova biomedical."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Medical treatment in chronic open-angle glaucoma : an update / Antonio Martinez Garcia, Javier Benitez-del-Castillo -- Melatonin protects the retina from glaucomatous damage / Ruth E. Rosenstein ... [et al.] -- Ocular tissue changes and glaucoma treatment / Cristiana Valente, Michele lester -- Uveitic glaucoma / Ester Carreno ... [et al.] -- Selective laser trabeculoplasty : a promising treatment for open angle glaucoma / Eman Elhawy, Gautam Kamthan, John Danias -- The parasurgical treatment of glaucoma / Felicia Ferreri ... [et al.] -- Effect of synthetic cannabinoid CB1 agonist (WIN 55212-2) and antagonist (AM 251) on intraocular pressure in rats / Sergio Pinar-Sueiro ... [et al.] -- Ocular perfusion pressure and retrobulbar haemodynamics in various types of glaucoma / Barbara Giambene -- New approaches in the pathogenesis of primary open-angle glaucoma : the vascular theory / Georgia Siasou ... [et al.].
Sommario/riassunto	Glaucoma is an eye disorder in which the optic nerve suffers damage, permanently damaging vision in the affected eye(s) and progressing to complete blindness if untreated. It is often, but not always, associated with increased pressure of the fluid in the eye. In this book, the authors present topical research in the study of the etiology, pathogenesis and treatments of glaucoma. Topics discussed in this compilation include medical treatment in chronic open-angle glaucoma; melatonin as a

therapeutic resource for the management of glaucoma; ocular tissue changes and glaucoma treatment; secondary uveitic glaucoma; selective laser trabeculoplasty and parasurgical treatment of glaucoma. (Imprint: Nova Biomedical)
