

1. Record Nr.	UNINA9910968127803321
Titolo	Acute exposure guideline levels for selected airborne chemicals . Vol. 6 // Committee on Acute Exposure Guideline Levels, Committee on Toxicology, Board on Environmental Studies and Toxicology, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 2008
ISBN	9786611800253 9780309177740 030917774X 9781281800251 1281800252 9780309112147 0309112141
Edizione	[1st ed.]
Descrizione fisica	1 online resource (319 p.)
Collana	Acute exposure guideline levels for selected airborne chemicals
Disciplina	615.9
Soggetti	Gases, Asphyxiating and poisonous Pollution Chemicals - Physiological effect
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Preface""; ""Contents""; ""Introduction""; ""Roster of the National Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances""; ""1 Allylamine""; ""2 Ammonia""; ""3 Aniline""; ""4 Arsine""; ""5 Crotonaldehyde, trans and cis + trans""; ""6 Dimethylhydrazine""; ""7 Iron Pentacarbonyl""; ""8 Monomethylhydrazine""; ""9 Nickel Carbonyl""; ""10 Phosphine and Eight Metal Phosphides""
Sommario/riassunto	This book is the sixth volume in the series Acute Exposure Guideline Levels for Selected Airborne Chemicals , and includes AEGLs for chemicals such as ammonia, nickel carbonyl and phosphine, among others. At the request of the Department of Defense, the National Research Council has reviewed the relevant scientific literature compiled by an expert panel and established Acute Exposure Guideline

Levels (AEGLs) for 12 new chemicals. AEGLs represent exposure levels below which adverse health effects are not likely to occur and are useful in responding to emergencies such as accidental or intentional chemical releases in the community, the workplace, transportation, the military, and for the remediation of contaminated sites. Three AEGLs are approved for each chemical, representing exposure levels that result in: 1) notable but reversible discomfort; 2) long-lasting health effects; and 3) life-threatening health impacts.
