## Sommario/riassunto

Events of the past twenty years, including the Cold War and the War on Terror, have meant that the environments of international development co-operation have changed extensively, with dramatic consequences for development policies and North-South relations in general. Perspectives on European Development Cooperation takes stock of such changes, describing and analyzing the new European development agenda, including the role of the European Union. Essays by prominent authorities in the field examine the development policies of individual donor countries and focus on the principles and objectives governing aid strategies and the performances of these policies. This book will be of interest to students of development studies and those involved in determining development policy.
