

1. Record Nr.	UNINA9910968302503321
Autore	Greenfield Michael D.
Titolo	Signalers and receivers : mechanisms and evolution of arthropod communication / / Michael D. Greenfield
Pubbl/distr/stampa	Oxford : , : Oxford University Press, , 2023
ISBN	0-19-770200-7 1-280-83420-X 9786610834204 0-19-535070-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (427 p.)
Collana	Oxford scholarship online
Disciplina	573.9215 595/.159
Soggetti	Arthropoda - Behavior Animal communication
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index. Previously issued in print: 2002.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; List of Symbols; 1. Communication in a Lilliputian World; 2. Signal Theory and the Language of Communication; 3. Chemical Signaling and the Olfactory Channel; 4. Sound and Vibration and the Mechanical Channel; 5. Bioluminescence and Reflected Light and the Visual Channel; 6. Sexual Selection and the Evolution of Signals; 7. Signal Evolution: Modification and Diversification; Notes; References; Glossary; Taxonomic Index; Subject Index
Sommario/riassunto	Because of their minute body size, most arthropods have problems sending and receiving acoustic and optical information. This book presents the story of how this group of animals use chemical signalling for sexual and social communication.
