

1. Record Nr.	UNINA9910968475403321
Titolo	Cellular automata // Thomas M. Li, editor
Pubbl/distr/stampa	New York, : Nova Science Publishers, Inc., c2011
ISBN	1-62100-148-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (309 p.)
Collana	Mathematics research developments Computer science, technology and applications
Altri autori (Persone)	LiThomas M
Disciplina	511.3/5
Soggetti	Cellular automata
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- CELLULAR AUTOMATA -- CELLULAR AUTOMATA -- CONTENTS -- PREFACE -- Chapter 1 CA UPGRADING FOR EXTENDING THE OPTIMIZATION PROBLEM SOLVING ABILITY -- ABSTRACT -- 1. INTRODUCTION -- How Can We Guide the System by CA? -- 2. COMPLEX SYSTEMS -- 3. OPTIMIZATION -- 3.1. History -- 3.2. Objective Function -- 3.3. System Optimization -- 4. OPTIMIZATION BY CA -- 4.1. Optimization by CA+SA -- 4.1.1. Simulated annealing -- 4.1.2. Procedure -- 4.1.3. A Sample problem solving -- 4.2. Optimization by CA -- 4.2.1. Procedure -- 4.2.2. A Sample problem solving -- 5. CONCLUSION -- REFERENCES -- Chapter 2 MODELING DRUG RELEASE USING CELLULAR AUTOMATA: EVOLUTION AND TRENDS IN PHARMACEUTICAL SCIENCES -- ABSTRACT -- 1. INTRODUCTION -- 2. HISTORICAL REVIEW -- 3. MODELING MATRIX EROSION -- 3.1. Describing the Primary State of the Matrix -- 3.2. Step 1 of Polymer Erosion: Water Penetration in the Matrix -- 3.3. Step 2 of Polymer Erosion: Polymer Degradation -- 3.4. Step 3 of Polymer Erosion: Loss of Polymer Bulk -- 4. MODELING DRUG DIFFUSION -- 5. EVALUATING THE PREDICTIVE VALUE OF MODELS -- 6. CONCLUSION -- REFERENCES -- Chapter 3 A MODEL OF CELLULAR AUTOMATA FOR THE SPATIAL ANALYSIS OF APHIDS AND LADYBUGS -- ABSTRACT -- 1. PRELIMINARIES -- 1.1. Citrus Sudden Death -- 1.2. Cellular Automata -- 1.3. Fuzzy Rule-Based System -- 2. CELLULAR AUTOMATA MODEL -- 3. SIMULATIONS WITH CELLULAR AUTOMATA MODEL -- CONCLUSIONS -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 4

CELLULAR AUTOMATA OPTIMIZATION VIA EVOLUTIONARY METHODS

Sommario/riassunto

A cellular automaton is a discrete model studied in computability theory, mathematics, physics, complexity science, theoretical biology and microstructure modeling. It consists of a regular grid of cells, each in one of a finite number of states, such as "On" or "Off". The grid can be in any finite number of dimensions. For each cell, a set of cells called its neighborhood (usually including the cell itself) is defined relative to the specified cell. This book presents current research from across the globe in the study of cellular automata, including using cellular automata to solve optimization problems; modeling drug release science using cellular automata; using the cellular automata model to study the dispersion of aphids and ladybugs in a block of citric trees; and the reversibility of cellular automata.
