

1. Record Nr.	UNINA9910968575403321
Autore	Norton Terrance I
Titolo	Aboveground oil storage tanks / / Terrance I. Norton
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2009
ISBN	1-60741-677-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (70 p.)
Disciplina	363.738/270973
Soggetti	Oil storage tanks - Safety measures Oil spills - Prevention Oil spills - Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Results in brief -- Background -- EPA allows regional offices flexibility in implementing the SPCC program while taking steps to promote consistency when needed -- EPA has limited information for implementing and evaluating the SPCC program -- States report that registration requirements lead to more effective tank program management and that better EPA-state coordination efforts would be beneficial -- Conclusions -- Appendix I. Objectives, scope, and methodology -- Appendix II. Summary of EPA regional survey results -- Appendix III. Comments from the Environmental Protection Agency.
Sommario/riassunto	Oil leaks from aboveground tanks have contaminated soil and water, threatening human health and wildlife. To prevent damage from oil spills, the Environmental Protection Agency (EPA) issued the Spill Prevention, Control, and Countermeasure (SPCC) rule in 1973. EPA's 10 regions inspect oil storage facilities to ensure compliance with the rule.
