Sommario/riassunto	Explains arbitrage, hedging, and speculation from the standpoint of a participant in the foreign exchange market-whether an individual trader or an institutional trader-who possesses analytical skill, economically sound judgment, and who has access to market data. In the foreign exchange market, arbitrage involves the simultaneous purchase and sale of a currency in different markets; the profit comes from the difference in the buying and selling prices. Hedging and

speculation are opposing strategies for dealing with risk; hedging is a cover, and speculation is an assumption of risk. Authors a
