Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. Environmental ideals and realities -- pt. II. Political and economic dimensions of the American experience -- pt. III. Social and cultural dimensions of Americanness.
Sommario/riassunto	American Space/American Place offers geographical perspectives on the condition of the United States at the outset of the twenty-first century. It compares the American ideal of liberty, equality, individual opportunity and social improvement with the contemporary condition of the regions, states and localities--the ideal American space with its reality as a place. It uses the public standard provided by the official ideology of the United States to see how well things are really going. Agnew and Smith consider the contrast between ideal and reality at local, state and national levels in education, health, and welfare, in community, race, gender, and calss relations, in economic and industrial development, and in the use and exploitation of America's landscape. American Space/American Place provides a series of compelling insights into the current condition of American Society, its natural environment and its place within the world.
