

1. Record Nr.	UNINA9910968788103321
Titolo	Federal strategic spectrum plan : harnessing and managing the nation's wireless spectrum // Yi Chan, editor
Pubbl/distr/stampa	New York, : Nova Science Publishers, Inc., 2008
ISBN	1-61324-604-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (260 p.)
Collana	Advances in communication and media research series
Altri autori (Persone)	ChanYi
Disciplina	0
Soggetti	Wireless communication systems - United States - Management Mobile communication systems - United States Radio frequency allocation - Government policy - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

Explores wireless technologies which are essential in supporting Federal agency missions that are crucial to the nation and enable commercial and non-Federal public safety operations which support economic growth and safeguard lives and property.
