

1. Record Nr.	UNINA9910968894603321
Titolo	Inventory systems : modeling and research methods / / Hui-Ming Wee, editor
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, 2011
ISBN	1-61728-727-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (210 p.)
Collana	Management science--theory and applications
Altri autori (Persone)	WeeHui-Ming
Disciplina	658.7/87015118
Soggetti	Inventory control - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. Introduction -- pt. II. Methods for independent demand -- pt. III. Methods for dependent demand.
Sommario/riassunto	Most organizations use, transform, distribute or sell materials of one or several kinds. The management of materials has serious implication on the financial, production, and marketing functions of an organization. As the level of complexity of a product increases, so does the importance of managing materials. To fulfill their role in providing products and services, enterprises must satisfy the needs of production, as well as services through the use of all resources such as labor, capital, equipment and materials. All these managerial activities are called materials management. This new book covers the topic of inventory systems.
