Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- investigating grammatical word class distinctions in bilingual aphasic individuals / Maria Kambanaros -- The Role of the Right Hemisphere in Language Processing in Aphasic Patients / Thomas Straube -- Category and Letter Fluency in Primary Progressive Aphasia, Semantic Dementia, and Alzheimer's Disease / Cecile A. Marczyński -- Real-time Comprehension in Agrammatic Aphasia / Petra B. Schumacher -- Synthetic Expressions Do Not Standby / Dieter G. Hillert -- Lateralizing Value of Postictal Perseveration in Temporal Lobe Epilepsy / Andras Fogarasi -- Assessment and treatment of bilingual aphasia and bilingual anomia / Patricia M. Roberts & Swathi Kiran -- Considerations for an Ethnopsycholinguistic Framework for Aphasia Intervention with Bilingual Speakers / Jose Centeno -- Imaging Poststroke Aphasia / A. Hillis -- Index.
Sommario/riassunto	This title examines the role of the right hemisphere for language processing and successful therapeutic interventions in aphasic patients. Furthermore, new findings for the understanding of neural processes involved in the recovery of language functions in aphasic subjects are discussed.
