Sommario/riassunto	Faithful Renderings reads translation history through the lens of Jewish-Christian difference and, conversely, views Jewish-Christian difference as an effect of translation. Subjecting translation to a theological-political analysis, Seidman asks how the charged Jewish-Christian relationship-and more particularly the dependence of Christianity on the texts and translations of a rival religion-has haunted

the theory and practice of translation in the West. Bringing together central issues in translation studies with episodes in Jewish-Christian history, Naomi Seidman considers a range of texts, from the Bible to Elie Wiesel's Night, delving into such controversies as the accuracy of various Bible translations, the medieval use of converts from Judaism to Christianity as translators, the censorship of anti-Christian references in Jewish texts, and the translation of Holocaust testimony. Faithful Renderings ultimately reveals that translation is not a marginal phenomenon but rather a crucial issue for understanding the relations between Jews and Christians and indeed the development of each religious community.

Sommario/riassunto

The importance of education in a global economy is undisputed, and in the wake of international assessment studies schools and kindergartens have become the focus of considerable public interest. As a new generation of educational environments are designed and built, this Design Manual helps architects to grasp the underlying educational theories and how they can be realized in built form, so that the building fulfils its role as a 3-dimensional curriculum plan. Over 80 international case studies covering all school types are examined and explained in the context of varying national and cultural education approaches. Among the key themes analyzed are the impact of modern communication technology, acoustic and lighting design, sustainability, internal circulation and outdoor spaces, renovation and adaptation to changing requirements.
