

1. Record Nr.	UNINA9910969212403321
Titolo	Modification and preparation of membrane in supercritical carbon dioxide // Guang-Ming Qiu ... [et al.]
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61470-316-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (127 p.)
Collana	Chemistry research and applications Novinka
Altri autori (Persone)	QiuGuang-Ming <1955->
Disciplina	660/.284248
Soggetti	Supercritical fluid extraction Supercritical fluids Liquid carbon dioxide Polymers - Solubility Membrane separation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- MODIFICATION AND PREPARATION OF MEMBRANE IN SUPERCRITICAL CARBON DIOXIDE -- MODIFICATION AND PREPARATION OF MEMBRANE IN SUPERCRITICAL CARBON DIOXIDE -- Library of Congress Cataloging-in-Publication Data -- CONTENTS -- PREFACE -- ACKNOWLEDGMENT -- Chapter 1: INTRODUCTION -- Chapter 2: MEMBRANE FORMATION VIA SCCO <sub>2</sub> INDUCED PHASE SEPARATION -- 2.1. PHASE SEPARATION OF FLUOROPOLYMER SOLUTION -- 2.2. CRYSTALLIZATION OF FLUOROPOLYMER SOLUTION -- 2.3. FORMATION OF POROUS MEMBRANE -- 2.4. EFFECT OF CO <sub>2</sub> PRESSURE ON MEMBRANE FORMATION -- 2.5. EFFECT OF TEMPERATURE ON MEMBRANE FORMATION -- 2.6. Effect of Polymer Concentration on Membrane Formation -- 2.7. Effect of Solvents on Membrane Formation -- Chapter 3: SUPERCRITICAL CARBONDIOXIDE EXTRACTION FOR MEMBRANE FORMATION IN TIPS -- 3.1. THERMALLY INDUCED PHASE SEPARATION (TIPS) -- 3.2. SCCO <sub>2</sub> EXTRACTION -- 3.2.1. SCCO <sub>2</sub> extraction procedures -- 3.2.2. SCCO <sub>2</sub> extraction conditions -- 3.3. THE MICROSTRUCTURE AND MORPHOLOGY OF MEMBRANES -- 3.4. COMPARISON BETWEEN DIFFERENT SOLVENT EXTRACTION -- Chapter 4:

MEMBRANE OF POLYMER BLENDS BY SCCO<sub>2</sub> -- 4.1. POLYMER BLENDING IN SCCO<sub>2</sub> -- 4.2. STRATEGY OF MODIFICATION FOR POLYMER/SUBSTRATE BLENDS -- 4.3. PREPARATION OF POLYMER BLEND MEMBRANES -- 4.4. CHARACTERIZATION OF POLYMER BLEND MEMBRANES -- 4.5. Copolymerizations of Styrene and Maleic Anhydride -- Chapter 5: SURFACE MODIFICATION OF MEMBRANE IN SCCO<sub>2</sub> -- 5.1. SURFACE-GRAFTED MEMBRANE -- 5.2. MECHANISM FOR GRAFT MODIFICATION OF POLYMER MEMBRANE -- 5.3. GRAFT COPOLYMERIZATION OF MAN/ST ONTO THE SURFACE OF PVDF MEMBRANE -- 5.4 CHARACTERIZATION OF THE GRAFTED CHAINS -- 5.5. MORPHOLOGIES AND STRUCTURE OF THE SMA-GRFTED PVDF MEMBRANE -- 5.6. SURFACE PROPERTIES OF THE SMA-BASED MEMBRANE -- Chapter 6: CONCLUSIONS -- REFERENCES -- INDEX -- Blank Page.

---

Sommario/riassunto

Supercritical carbon dioxide (SCCO<sub>2</sub>) has dissolving power comparable to that of liquids, is much more compressible than dilute gases, and has transport properties intermediate between gas- and liquid-like. This book articles summarizes the modifications and preparations of membranes that have been conducted in SCCO<sub>2</sub>.
