

1. Record Nr.	UNINA9910969284303321
Autore	Mayer Kristy
Titolo	Elite capture : residential tariff subsidies in India // Kristy Mayer, Sudeshna Ghosh Banerjee, and Chris Trimble
Pubbl/distr/stampa	Washington, D.C. : , : World Bank, , [2014]
ISBN	9781464804151 146480415X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (pages cm)
Collana	India power sector review
Disciplina	333.793/230954
Soggetti	Electric utilities - India Tariff - India Subsidies - India Elite (Social sciences) - India
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Contents; Foreword; Acknowledgments; Abbreviations; Executive Summary; Chapter 1 Introduction; Setting Residential Tariffs; Study Goal and Objectives; Data Sources; Terminology and Key Concepts; Targeting the Poor; Structure of This Report; Figures; Figure 1.1 BPL and APL Households across India, by Income Quintile, 2010; Annex 1A: National Sample Survey Description; Annex 1B: Technical Note on Matching Households and Tariff Schedules; Notes; Chapter 2 Patterns of Residential Consumption and Subsidy and Cost Trends; Residential Sector Profile Figure 2.1 Electricity Consumption and Revenue to Utilities, by Sector, 2010 Figure 2.2 Electricity Access Rates for Selected States, 2010; Subsidy and Cost Trends; Figure 2.3 Recent Trend in Subsidy Incidence, by Income Quintile; Figure 2.4 Rapid Rise in Average Subsidy Cost; Figure 2.5 Increasing Cost of Electricity Supply and Falling Tariffs, 2005-10; Figure 2.6 Change in Electricity Access Rates, by Income Quintile, 2005 and 2010; Notes; Figure 2.7 Change in Average Electricity Consumption, by Income Quintile, 2005 and 2010; Chapter 3 Residential Tariffs Overview; Tariff Structures Tariff Schedule Characteristics Figure 3.1 Features of Increasing Block

Tariff, 2010; Figure 3.2 Types of IBT Schedules Implemented by States, 2010; Tables; Table 3.1 Examples of State Tariff Schedules Used in This Analysis; Table 3.2 Residential Tariff Schedule Types, 2010; How Fixed Charges Impact the Poor; Boxes; Box 3.1 Snapshot of BPL Tariff Programs; Figure 3.3 Example of Average Effective Tariffs, 2010; Table 3.3 Average Effective Tariff for Representative Monthly Consumption Levels, 2010; Concluding Remarks; Figure 3.4 Average Effective Tariffs for Urban Households in Rajasthan, 2010

## Sommario/riassunto

India is home to one of the world's largest populations without electricity access. Traditionally, the Government of India has extended rural electrification using two instruments: consumption subsidies and free connections to households below the poverty line (BPL). This study centers on subsidies for electricity consumption, examine their size, frequency, and distribution to households. It uses poverty as a lens through which to focus more closely on these concepts, asking such questions as how well subsidies are targeted to BPL households. The study findings demonstrate that subsidies cover
