ISBN	1-283-42389-8 9786613423894 90-272-7420-7
Descrizione fisica	1 online resource (198 p.)
Altri autori (Persone)	EggingtonWilliam WrenHelen
Disciplina	306.44/9/09175
Soggetti	Language policy - English-speaking countries Language and languages - Political aspects English language - Political aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	LANGUAGE POLICY DOMINANT ENGLISH, PLURALIST CHALLENGES; Title page; Copyright page; Table of Contents; Acknowledgments; FOREWORD PALMAM QUI MERUIT FERAT; Introduction; Are the stated purposes viable?; Entry into the profession; The self-image of ESL/EFL teachers; Conclusion; References; INTRODUCTION; PART I. THE DOMINANCE OF ENGLISH AND NATIONAL LANGUAGE POLICIES: AN OVERVIEW; CHAPTER 1. MAKING A DIFFERENCE IN LANGUAGE POLICY AGENDAS; Overview; 1. Thinking globally, acting locally; 2. Helping the TESOL teachers' association work for students 3. Learning from the language policies and practices of other countries Thinking globally, acting locally: the teacher's role; Helping the TESOL teachers' association work for students; Learning from the language policies and practices of other countries; Where do we go from here?; References; CHAPTER 2. THE ENGLISH LANGUAGE METAPHORS WE PLAN BY; Introduction; The impact of socially shared metaphors; English language related metaphors; Foundation metaphors; Expansion metaphors (17th - mid-20th century); Contemporary metaphors (Mid-20th Century -); Conclusion: metaphor and policy; References

PART II. LANGUAGE AND LANGUAGE-IN-EDUCATION POLICIES IN ENGLISH-DOMINANT NATIONS CHAPTER 3. "THE GROWN-UPS KNOW BEST": LANGUAGE POLICY-MAKING IN BRITAIN IN THE 1990's; Linguistic profile of the United Kingdom; Provision for languages in the UK; Changes after the 1988 Education Bill; The appropriation of English; Language planning in Britain today; Implications for bilingual and bi-dialectal pupils; Back to the basics; References; CHAPTER 4. LANGUAGE POLICY IN THE USA: NATIONAL VALUES, LOCAL LOYALTIES, PRAGMATIC PRESSURES

A definition and framework: no official, but multiple, informal policies
Educational governance: national or local?; Regional and ethnic influences, historical and contemporary; Ideological and structural tensions; Bilingual education: new federal-local connections; Bilingualism for all: moves toward the mainstream; Instruction in other languages: lofty visions, local realities; Some final thoughts; References; CHAPTER 5. ENGLISH LANGUAGE-IN-EDUCATION POLICIES IN CANADA; Francophone learners of English in Quebec; First Nations learners of English; Prevalent issues and recent developments
1. Equity of access to language education
2. Tensions between regional situations and differing levels of responsibility; 3. Relations of language education to other societal issues and cultural processes; 4. Maintenance of languages other than English or French; 5. Developing resources, research, theories, and facilitating structures; References; CHAPTER 6. ENGLISH AND PLURALISTIC POLICIES: THE CASE OF AUSTRALIA; Introduction; Overview of language planning in Australia; Language policies since the 1960's; Debates and issues on language policy today; English; Australian English
Aboriginal English

Sommario/riassunto

'Think globally, act locally' is the message of Language Policy: Dominant English, Pluralist Challenges. The book examines the impact of English in countries in which it is taken for granted - Australia, Britain, Canada, New Zealand, and the USA. It explores how the dominance of English impacts on the development of national language policies, the maintenance of minority languages, the ability to provide services in other languages, the efforts to promote first language and bilingual education programs, and the opportunities for adult and child second language and literacy training.

Nota di contenuto	Communication in Humans and Other Animals -- Editorial page -- Title page -- LCC data -- Table of contents -- Acknowledgements -- 1. Introduction -- 1.1 Introducing communicative behaviour -- 1.1.1 Social life and the need of communication -- 1.1.2 Linguistic perspectives on communication and language -- 1.1.3 Biological perspectives on communication -- 1.1.4 Comparing linguistic and biological perspectives -- 1.2 Major themes in comparisons between human and animal communication -- 1.2.1 Hockett's design features -- 1.2.2 Methodology and research questions -- 1.2.3 Do animals use displacement? -- 1.2.4 Do animals have combinatorial principles? -- 1.2.5 Do animal systems have arbitrary content/form relations? Do animals learn the system? -- 1.2.6 How did language evolve? -- 1.3 Parent-offspring communication and cooperative breeding -- 1.4 Summary -- 1.5 Suggested readings -- 2. Overview of biological signal systems -- 2.1 Introduction -- 2.2 Research methods and observational techniques -- 2.2.1 Playback as a method for investigating communication -- 2.2.2 Advances in technology influence the methods -- 2.3 Acoustic communication -- 2.3.1 When and where? -- 2.3.2 How? Production and perception -- 2.3.3 Echolocation and

other sounds in dolphins and whales -- 2.4 Visual communication -- 2.4.1 When and where? -- 2.4.2 How? Visual capacities -- 2.4.3 Colour patterns -- 2.4.4 Body postures and facial expressions -- 2.5 Tactile communication -- 2.5.1 When and where? -- 2.5.2 How? Skin, whiskers and sidelines -- 2.6 Indirect tactile signals - the seismic signal system -- 2.7 Chemical communication -- 2.7.1 When and where? -- 2.7.2 How? -- 2.7.3 The olfactory system -- 2.8 Electrical communication -- 2.9 The multimodal honeybee - acoustic, visual, chemical, seismic communication -- 2.10 Summary -- 2.11 Suggested readings.

3. Human language - its use and learning -- 3.1 Introduction -- 3.1.1 Social life and the languages of the world -- 3.1.2 Observation techniques -- 3.1.3 Language functions -- 3.2 The child's discovery of language - the first year of life -- 3.2.1 Parent - infant interaction -- 3.2.2 The "little universalist" - early perception of speech sounds -- 3.2.3 Early vocalization - babbling -- 3.3 Language in the toddler -- 3.3.1 Mapping forms to meanings -- 3.3.2 Cultural differences reflected in children's language -- 3.3.3 Words and world-views - what do you call your cousin? -- 3.3.4 But what about grammar? -- 3.3.5 Recursion -- 3.4 When problems arise - Specific Language Impairment -- 3.5 Second language acquisition - organizing language once again -- 3.6 Sign language - another modality -- 3.7 Summary -- 3.8 Suggested readings -- 4. Human nonverbal communication -- 4.1 Introduction -- 4.1.1 Research methods and observation techniques -- 4.2 Functions - what do we use nonverbal communication for? -- 4.2.1 Permanent versus temporary expressions -- 4.2.2 Synchronising in sympathy -- 4.3 Acoustic communication -- 4.3.1 Extralinguistic expressions - laughters and cries -- 4.3.2 Paralinguistic expressions - with speech -- 4.4 Visual communication -- 4.4.1 Body postures -- 4.4.2 Hand movements - pointing -- 4.4.3 Other hand gestures -- 4.4.4 Head and face -- 4.4.5 Eyes and gaze -- 4.4.6 Complexion -- 4.5 Tactile communication -- 4.6 Chemical communication -- 4.7 A model for analyzing gestures - The Ekman and Friesen model -- 4.8 Where verbal and non-verbal communication meet: Speech-related gestures -- 4.8.1 The McNeill model -- 4.8.2 Using knowledge of nonverbal expressions in verbal descriptions -- 4.9 When production is not automatized -- 4.10 Summary -- 4.11 Suggested readings -- 5. Our closest relatives - nonhuman primates. 5.1 Introduction -- 5.1.1 The primate family -- 5.1.2 Social life -- 5.1.3 Studying nonhuman primates - how it all began -- 5.1.4 Observation techniques -- 5.2 Communicative functions -- 5.2.1 The referential function - first reported in vervet monkeys -- 5.2.2 The social function - with focus on synchronization of behaviour -- 5.3 Acoustic communication -- 5.3.1 Some vocalizations and their use -- 5.3.2 Vocal learning in nonhuman primates -- 5.3.3 Structural aspects of vocalizations - do nonhuman primates have syntax? -- 5.4 Visual communication -- 5.4.1 Body postures -- 5.4.2 Hand and arm gestures -- 5.4.3 Face and gaze -- 5.5 Tactile communication - a lot of grooming -- 5.6 Chemical communication -- 5.7 Cultural/dialectal differences - results of social learning -- 5.8 Teaching human language to nonhuman primates -- 5.8.1 Speech -- 5.8.2 Sign language -- 5.8.3 Plastic chips -- 5.8.4 Computers and lexigrams -- 5.9 Discussion - primary versus secondary communication in nonhuman primates -- 5.9.1 Primary communication - data base -- 5.9.2 Primary communication - functions and structures -- 5.9.3 Secondary communication - human language as a second variety -- 5.10 Summary -- 5.11 Suggested readings -- 6. Man's best friend - the dog -- 6.1 Introduction -- 6.1.1 The Canine class -- 6.1.2 Social

life of wolves and dogs -- 6.1.3 Observation techniques -- 6.2
Functions of Canine communication -- 6.2.1 Social functions -- 6.2.2
Studies of the referential function -- 6.3 Acoustic communication --
6.3.1 Barking -- 6.3.2 Growling -- 6.3.3 Chorus howling in wolves --
6.4 Visual communication -- 6.4.1 Head and face -- 6.4.2 Tail -- 6.5
Tactile communication -- 6.6 Chemical communication -- 6.7
Developmental patterns in intra-specific communication -- 6.8 The
dog in the human family - learning to communicate
with another species.
6.8.1 Dogs' understanding of humans -- 6.8.2 Humans'
understanding of dogs -- 6.8.3 Not interactional synchrony - but
accommodation -- 6.9 Summary -- 6.10 Suggested readings -- 7.
Communication in birds -- 7.1 Introduction -- 7.1.1 The Aves class --
7.1.2 Social life of birds -- 7.1.3 Observation techniques -- 7.2
Functions - why do birds communicate? -- 7.2.1 Alignment of songs -
counter-singing and duetting -- 7.2.2 Referential function in birds -
the calls of the domestic fowl -- 7.3 Acoustic communication -- 7.3.1
Variation across and within species -- 7.3.2 Structural aspects of song
-- 7.4 Learning how to sing -- 7.4.1 Sensitive phases and
developmental stages -- 7.4.2 Dialectal differences -- 7.5 Visual
communication -- 7.5.1 Talking with the tail -- 7.6 Chemical
communication -- 7.7 Birds and humans -- 7.7.1 Teaching language
to birds -- 7.8 Summary -- 7.9 Suggested readings -- 8. Discussion
and outlook - why language? -- 8.1 Introduction -- 8.1.1 Social life
and communication in humans and animals -- 8.2 What is so special
about language? Revisiting Hockett's predictions -- 8.3 Why and how
did language evolve? -- 8.3.1 Why and when did it happen? -- 8.3.2
Are there any parallel changes in human physiology? -- 8.3.3 Is
language a result of cooperative breeding? -- 8.4 Learning intraspecific
communication - not only for humans -- 8.4.1 Child language and
animal communication -- 8.5 Can language be taught to nonhumans?
-- 8.6 Summary -- 8.7 Suggested readings -- Glossary -- References
-- Index.

Sommario/riassunto

Communication is a basic behaviour, found across animal species. Human language is often thought of as a unique system, which separates humans from other animals. This textbook serves as a guide to different types of communication, and suggests that each is unique in its own way: human verbal and nonverbal communication, communication in nonhuman primates, in dogs and in birds. Research questions and findings from different perspectives are summarized and integrated to show students similarities and differences in the rich diversity of communicative behaviours. A core topic is how young individuals proceed from not being able to communicate to reaching a state of competent communicators, and the role of adults in this developmental process. Evolutionary aspects are also taken into consideration, and ideas about the evolution of human language are examined. The cross-disciplinary nature of the book makes it useful for courses in linguistics, biology, sociology and psychology, but it is also valuable reading for anyone interested in understanding communicative behaviour.
