

1. Record Nr.	UNINA9910969374403321
Titolo	Marine conservation biology : the science of maintaining the sea's biodiversity / / edited by Elliott A. Norse and Larry B. Crowder ; foreword by Michael E. Soule
Pubbl/distr/stampa	Washington, : Island Press, c2005
ISBN	1-59726-771-6 1-4356-4856-0
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (497 p.)
Altri autori (Persone)	NorseElliott A CrowderLarry B
Disciplina	333.95/616
Soggetti	Marine biodiversity conservation Biodiversity conservation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title Page; Copyright Page; Table of Contents; Foreword; Preface: A New Science for a New Century; Acknowledgments; Ch. 1: Why Marine Conservation Biology?; Ch. 2: Back to the Future in Marine Conservation; Part One: Marine Populations: The Basics; Ch. 3: The Life of the Sea: Implications of Marine Population Biology to Conservation Policy; Ch. 4: The Allee Effect in the Sea; Ch. 5: Extinction Risk in Marine Species; Ch. 6: Behavioral Approaches to Marine Conservation; Part Two: Threats to Marine Biological Diversity Ch. 7: The Potential for Nutrient Overenrichment to Diminish Marine BiodiversityCh. 8: The Magnitude and Consequences of Bioinvasions in Marine Ecosystems: Implications for Conservation Biology; Ch. 9: Diseases and the Conservation of Marine Biodiversity; Ch. 10: Multiple Stressors in Marine Systems; Part Three: The Greatest Threat: Fisheries; Ch. 11: Global Fisheries and Marine Conservation: Is Coexistence Possible?; Ch. 12: The Global Destruction of Bottom Habitats by Mobile Fishing Gear; Ch. 13: Effects of Fishing on Long-Lived Marine Organisms Ch. 14: Evolutionary Impacts of Fishing on Target PopulationsCh. 15: Are Sustainable Fisheries Achievable?; Part Four: Place-Based Management of Marine Ecosystems; Ch. 16: Marine Protected Areas and

Biodiversity Conservation; Ch. 17: Marine Reserve Function and Design for Fisheries Management; Ch. 18: Place-Based Ecosystem Management in the Open Ocean; Ch. 19: Metapopulation Structure and Marine Reserves; Part Five: Human Dimensions; Ch. 20: Developing Rules to Manage Fisheries: A Cross-Cultural Perspective; Ch. 21: The Role of Legal Regimes in Marine Conservation  
Ch. 22: Uncertainty in Marine ManagementCh. 23: Recovering Populations and Restoring Ecosystems: Restoration of Coral Reefs and Related Marine Communities; Ch. 24: Toward a Sea Ethic; Ch. 25: Ending the Range Wars on the Last Frontier: Zoning the Sea; About the Editors; Contributors; Index ; Species Index

### Sommario/riassunto

Humans are terrestrial animals, and our capacity to see and understand the importance and vulnerability of life in the sea has trailed our growing ability to harm it. While conservation biologists are working to address environmental problems humans have created on land, loss of marine biodiversity, including extinctions and habitat degradation.
