| Note generali           | Description based upon print version of record.  |
| Nota di bibliografia    | Includes bibliographical references and index.   |
| Nota di contenuto       | Introduction -- Prices over space -- Prices over time (storage) -- Prices over time (commodity futures) -- Prices over form (quality) -- Prices linkages across commodity markets -- Marketing margins in vertical supply chains -- Auctions and competitive bidding -- Bargaining in bilateral exchange.  |
| Sommario/riassunto      | The price of food has become very volatile in recent years for a variety of reasons, including a strengthened connection between the prices of agricultural commodities and other commodities such as oil and metals, more volatile production due to more frequent droughts and floods, and a rising demand for biofuels. Understanding the determinants of agricultural commodity prices and the connections between prices has become a high priority for academics and applied economists who are interested in agricultural marketing and trade, policy analysis and international rural development. |
