Indirect Control and Its Consequences f or the Child's Emotional and Cognitive Development; 3.4.3.3. Indirect

Sommario/riassunto	Although mother and daughter are two central female roles, they have rarely been investigated. The relationship is specific, certainly different than the mother-son or father-daughter relationships. And this difference manifests itself in sex-specific language behavior. Despite 'eternal' features of the mother-daughter relationship, its quality is affected by individual psychological and by sociocultural variables. Thus, investigations took place in two big cities with very different structures and traditions: Vienna and Los Angeles.
