Sommario/riassunto

The papers in this volume have been grouped in three thematic parts:
 Valence which plays a key concept in the syntactic classification of
 verbs and adjectives, provides a necessary link for decoding and
 encoding grammatical relations, and is an important requisite for the
 evaluation of formal languages for the purpose of describing and
 explaining phenomena of natural language. The second group of
 papers concerns the notion of (deep) case and the implications of
 tracing a grammatical theory on semantic case. The final series of
 papers is distinguished by the degree of accent it puts on the link
