| 1. Record Nr. | UNINA9910969777303321 |
| Titolo | Assessing readiness in military women : the relationship of body composition, nutrition, and health / / Committee on Body Composition, Nutrition, and Health of Military Women, Committee on Military Nutrition Research, Food and Nutrition Board, Institute of Medicine |
| Pubbl/distr/stampa | Washington, D.C., : National Academy Press, 1998 |
| ISBN | 9786610186938 9780309174091 0309174090 9781280186936 1280186933 9780309556897 0309556899 9780585037257 0585037256 |
| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (368 pages) |
| Disciplina | 355/.0082 |
| Soggetti | Women soldiers - United States - Nutrition Women soldiers - Health and hygiene - United States Body composition United States Armed Forces Women United States Armed Forces Operational readiness |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Bibliographic Level Mode of Issuance: Monograph |
| Nota di bibliografia | Includes bibliographical references (p. 295-333) and index. |
| Nota di contenuto | Assessing Readiness in Military Women -- Copyright -- Preface -- REFERENCE -- Contents -- Assessing Readiness in Military Women -- Executive Summary -- THE COMMITTEE'S TASK -- METHODS -- BACKGROUND -- FINDINGS -- RECOMMENDATIONS -- RECOMMENDATIONS FOR FUTURE RESEARCH -- Survey Design and Administration -- Relevant Data from Previous Surveys of Military Personnel and in Existing DoD Databases -- Effective Use of Existing Data -- Recommendations for New Methods -- Additional Data Needed |

Sommario/riassunto

In 1992, the Committee on Military Nutrition Research reviewed the existing standards and found that the standards for body composition required for women to achieve an appearance goal seemed to conflict with those necessary to ensure the ability to perform many types of military tasks. This report addresses that conflict.
