## Sommario/riassunto

A report assessing the capacity of the federal government to recruit and retain qualified individuals in science and engineering. Examines mechanisms for conducting federal science and technology-related work that could be used to enhance recruitment, and addresses questions of organizational responsibility for implementing changes. Topics include the civil service system, FEPCA provisions, and ethics. Appendices list statistics on federal scientists and engineers. Lacks an index and a bibliography. Annotation copyright by Book News, Inc., Portland, OR
