Sommario/riassunto	People's identities are addressed and brought into being by interaction with others. Identity processes encompass biographical experiences,

historical eras and cultural norms in which the self's autonomy varies according to the flux of power relationships with others. Identity Structure Analysis (ISA) draws upon psychological, sociological and social anthropological theory and evidence to formulate a system of concepts that help explain the notion of identity. They can be applied to the practical investigations of identity structure and identity development in a number of clinical, so
