Sommario/riassunto	A memoir from the award-winning author of My Lesbian Husband, Barrie Jean Borich's Body Geographic turns personal history into an inspired reflection on the points where place and person intersect, where running away meets running toward, and wheredislocation means finding oneself. One coordinate of Borich's story is Chicago, the prototypical Great Lakes port city built by immigrants like her great-grandfather Big Petar, and the other is her own port of

immigration, Minneapolis, the combined skylines of these two cities tattooed on Borich's own back. Between Chicago and Minneapolis Borich maps her own Midwest, a true heartland in which she measures the distance between the dreams and realities of her own life, her family's, and her fellow travelers' in the endless American migration. Covering rough terrain-from the hardships of her immigrant ancestors to the travails of her often-drunk young self, longing to be madly awake in the world, from the changing demographics of midwestern cities to the personal transformations of coming out and living as a lesbian- Body Geographic is cartography of high literary order, plotting routes, real and imagined, and putting an alternate landscape on the map.

Sommario/riassunto	Monetary policy, at least in part, operates through both an interest rate and credit channel. The question arises, therefore, whether monetary policy is a less potent a device in affecting output and inflation in countries that have low levels of credit and where investment and consumption are not financed by borrowing in local currency. This paper employs a Panel Vector Auto Regression approach to examine the empirical evidence in a broad sample of emerging market countries. The data suggests that the effectiveness of changes in policy interest rates in influencing the path of inflation appear to be unrelated to the level of credit and that, instead, the willingness to allow exchange rate flexibility is a far more important determining factor.
