Sommario/riassunto	This paper empirically assesses the impact of oil price shocks on the underlying non-oil economic cycle in oil-exporting countries. Panel VAR analysis and the associated impulse responses indicate that in countries where the oil sector is large in relation to the economy, oil price changes affect the economic cycle only through their impact on fiscal policy. Once fiscal policy changes are removed, oil price shocks do not have a significant independent effect on the economic cycle.

Sommario/riassunto	This report presents estimates of the gross regional product (GRP) of the Kurdistan Region-Iraq in 2012 (excluding natural resources, because of lack of available data). It also describes efforts to set up a system for continuing data collection and analysis to support the annual calculation of the GRP, a critical indicator for successful policy planning.
