

1. Record Nr.	UNINA9910970310903321
Autore	McCabe James D
Titolo	Network analysis, architecture, and design // James D. McCabe
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Elsevier/Morgan Kaufmann Publishers, c2007
ISBN	9786611118969 9781281118967 1281118966 9780080548753 008054875X
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (474 pages)
Collana	The Morgan Kaufmann series in networking
Disciplina	004.6/5
Soggetti	Computer networks - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Network Analysis, Architecture, and Design; Copyright Page; Contents; FOREWORD; PREFACE; ACKNOWLEDGMENTS; Chapter 1. Introduction; 1.1 Objectives; 1.2 Preparation; 1.3 Background; 1.4 Overview of Analysis, Architecture, and Design Processes; 1.5 A Systems Methodology; 1.6 System Description; 1.7 Service Description; 1.8 Service Characteristics; 1.9 Performance Characteristics; 1.10 Network Supportability; 1.11 Conclusion; 1.12 Exercises; Chapter 2. Requirements Analysis: Concepts; 2.1 Objectives; 2.2 Background; 2.3 User Requirements; 2.4 Application Requirements 2.5 Device Requirements 2.6 Network Requirements; 2.7 Other Requirements; 2.8 The Requirements Specification and Map; 2.9 Conclusions; 2.10 Exercises; Chapter 3. Requirements Analysis: Process; 3.1 Objectives; 3.2 Gathering and Listing Requirements; 3.3 Developing Service Metrics; 3.4 Characterizing Behavior; 3.5 Developing RMA Requirements; 3.6 Developing Delay Requirements; 3.7 Developing Capacity Requirements; 3.8 Developing Supplemental Performance Requirements; 3.9 Environment-Specific Thresholds and Limits; 3.10 Requirements for Predictable and Guaranteed Performance 3.11 Requirements Mapping 3.12 Developing the Requirements Specification; 3.13 Conclusions; 3.14 Exercises; Chapter 4. Flow

Analysis; 4.1 Objectives; 4.2 Background; 4.3 Flows; 4.4 Identifying and Developing Flows; 4.5 Data Sources and Sinks; 4.6 Flow Models; 4.7 Flow Prioritization; 4.8 The Flow Specification; 4.9 Example Application of Flow Analysis; 4.10 Conclusions; 4.11 Exercises; Chapter 5. Network Architecture; 5.1 Objectives; 5.2 Background; 5.3 Component Architectures; 5.4 Reference Architecture; 5.5 Architectural Models; 5.6 Systems and Network Architectures; 5.7 Conclusions
5.8 ExercisesChapter 6. Addressing and Routing Architecture; 6.1 Objectives; 6.2 Background; 6.3 Addressing Mechanisms; 6.4 Routing Mechanisms; 6.5 Addressing Strategies; 6.6 Routing Strategies; 6.7 Architectural Considerations; 6.8 Conclusions; 6.9 Exercises; Chapter 7. Network Management Architecture; 7.1 Objectives; 7.2 Background; 7.3 Defining Network Management; 7.4 Network Management Mechanisms; 7.5 Architectural Considerations; 7.6 Conclusions; 7.7 Exercises; Chapter 8. Performance Architecture; 8.1 Objectives; 8.2 Background; 8.3 Developing Goals for Performance
8.4 Performance Mechanisms8.5 Architectural Considerations; 8.6 Conclusions; 8.7 Exercises; Chapter 9. Security and Privacy Architecture; 9.1 Objectives; 9.2 Background; 9.3 Developing a Security and Privacy Plan; 9.4 Security and Privacy Administration; 9.5 Security and Privacy Mechanisms; 9.6 Architectural Considerations; 9.7 Conclusions; 9.8 Exercises; Chapter 10. Network Design; 10.1 Objectives; 10.2 Design Concepts; 10.3 Design Process; 10.4 Vendor, Equipment, and Service-Provider Evaluations; 10.5 Network Layout; 10.6 Design Traceability; 10.7 Design Metrics; 10.8 Conclusions
10.9 Exercises

Sommario/riassunto

Traditionally, networking has had little or no basis in analysis or architectural development, with designers relying on technologies they are most familiar with or being influenced by vendors or consultants. However, the landscape of networking has changed so that network services have now become one of the most important factors to the success of many third generation networks. It has become an important feature of the designer's job to define the problems that exist in his network, choose and analyze several optimization parameters during the analysis process, and then prioritize and evalua
