

1. Record Nr.	UNINA9910970472403321
Titolo	Water harvesting in Sub-Saharan Africa / / edited by William Critchley and John Gowing ; associate editor, Eefke Mollee
Pubbl/distr/stampa	Abingdon, Oxon ; ; New York, N.Y. : , : Routledge, , 2012
ISBN	1-136-27305-0 1-283-94248-8 0-203-10998-8 1-136-27306-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (218 p.)
Altri autori (Persone)	CritchleyWill GowingJohn W MolleeEefke
Disciplina	627/.50967
Soggetti	Water harvesting - Africa, Sub-Saharan Water-supply - Africa, Sub-Saharan
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Water Harvesting in Sub-Saharan Africa; Copyright; Contents; Contributors; Acronyms and abbreviations; Acknowledgements; Foreword; Chapter 1 Introduction; Chapter 2 Water harvesting for crop production in Sub-Saharan Africa: Challenges, concepts and practices; Chapter 3 A review of the recent literature on water harvesting in Sub-Saharan Africa; Chapter 4 Burkina Faso: A cradle of farm-scale technologies; Chapter 5 Ethiopia: Opportunities for building on tradition - time for action; Chapter 6 Kenya: From drought relief to business model Chapter 7 Niger: Small-scale and simple for sustainability Chapter 8 Tanzania: Bright spots and barriers to adoption; Chapter 9 Sudan: Ancient traditions receiving a new impetus; Chapter 10 Zimbabwe: Keeping runoff on the land; Chapter 11 Investing in water for agriculture in the drylands of Sub-Saharan Africa: Considerations for a conducive policy environment; Chapter 12 Conclusions, lessons and an agenda for action; Glossary; Index
Sommario/riassunto	Agriculture in Sub-Saharan Africa is constrained by highly variable

rainfall, frequent drought and low water productivity. There is an urgent need, heightened by climate change, for appropriate technologies to address this problem through managing and increasing the quantity of water on farmers' fields - water harvesting. This book defines water harvesting as a set of approaches which occupy an intermediate position along the water-management spectrum extending from in situ moisture conservation to irrigated agriculture. They generally comprise small-scale systems that induce, coll
