| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (102 p.) |
| Altri autori (Persone) | HerdmanRoger MosesHarold L |
| Disciplina | 651.5 |
| Soggetti | Health - Research - Access control Medical records - Access control Privacy |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | ""Front Matter""; ""Contents""; ""1 Introduction""; ""2 Prepared Presentations and Discussion""; ""Glossary""; ""Appendix Workshop Agenda"" |
| Sommario/riassunto | The Health Insurance Portability and Accountability Act (HIPAA) of 1996 was enacted to improve the portability and continuity of health insurance; promote medical savings accounts; improve access to long-term care services and coverage; and simplify the administration of health insurance. HIPAA's Administrative Simplification provisions focus on facilitating the electronic exchange of information for financial and administrative functions related to patient care. However, the very advances that make it easier to transmit information also present |

challenges to preserving the confidentiality of potentially sensitive personal information contained in medical records. In 2003, the President's Cancer Panel discovered HIPAA Privacy Rule slowed research on cancer survivors, as well as causing increased bureaucracy, informed consent problems, and complications for clinical trials. Effect of the HIPAA Privacy Rule on Health Research evaluates the impact of HIPAA provisions and provides guidance to legislators on amendments needed to make this law better serve the interests of cancer survivors and others.
