Titolo	Rianimazione in eta pediatrica / / [edited by] Lorenzo Mirabile, Simonetta Baroncini ; Prefazione di Paolo Busoni
Pubbl/distr/stampa	Milan, : Springer, 2012
ISBN	1-280-80210-3 9786613710451 88-470-2059-X
Edizione	[1st ed. 2012.]
Descrizione fisica	1 online resource (754 p.)
Altri autori (Persone)	MirabileLorenzo BaronciniSimonetta BusoniPaolo
Disciplina	618.92
Soggetti	Pediatric intensive care
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Aspetti generali e inquadramento del paziente -- pt. 2. Apparato respiratorio e condizioni respiratorie critiche -- pt. 3. Apparato cardiocircolatorio e condizioni cardiocircolatorie critiche -- pt. 4. Sistema nervoso e condizioni neurologiche -- pt. 5. Insufficienze d'organo -- pt. 6. Traumi e ustioni -- pt. 7. Morte cerebrale e donazione d'organo -- pt. 8. Disordini endocrinologici e gastrointestinali -- pt. 9. Tecniche di rianimazione -- pt. 10. Trattamento farmacologico -- pt. 11. Il neonato pretermine.
Sommario/riassunto	La gestione e la rianimazione del bambino in condizioni critiche coinvolgono un vasto campo di conoscenze, tecniche e terapie che richiedono una prospettiva del tutto specifica. Questo volume, rivolto ad anestesisti rianimatori, chirurghi pediatrici e neonatologi, affronta tutte le principali tematiche legate alla terapia pediatrica d'urgenza: l' inquadramento del paziente, le condizioni critiche provocate da insufficienze d'organo, traumi, ustioni, disordini endocrinologici e gastrointestinali; argomenti delicati e cruciali come la morte cerebrale e la donazione d'organo, le diverse tecniche di rianimazione, i farmaci off label, le criticità specifiche del neonato pretermine. In quest'opera di particolare vastità, che ha coinvolto un gran numero di esperti, si è

cercato di includere tutte le tematiche più decisive nella rianimazione pediatrica, e per questo potrà diventare un essenziale riferimento per tutti gli specialisti del settore.

Edizione	[1st ed.]
Descrizione fisica	vi, 113 p. : ill
Disciplina	370.15/23
Soggetti	Learning, Psychology of Learning - Physiological aspects Brain Memory Teaching
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (p. 106-107) and index.
Nota di contenuto	Losing your mind : the function of brain cells -- Chicken soup for the brain : the effects of brain chemicals -- Pieces and parts : the anatomy of the brain -- Strolling down memory lanes : memory and storage systems -- Where is Wally? Locating memories in the brain -- The path most traveled : semantic memory instructional strategies -- The lanes less traveled : instructional strategies for episodic, procedural, automatic, and emotional memory -- Producing the evidence : assessment that mirrors instructional strategies -- Frequently asked questions.
Sommario/riassunto	Help students improve their memory and make their learning

permanent by using the simple strategies in this fascinating guide for teachers. Discover where knowledge is stored, how it's retrieved, and what types of learning experiences trigger recall. Learn how to present material so that students have multiple ways to store and recall it.

Soggetti	Human geography Artificial intelligence Geography Human Geography Artificial Intelligence Regional Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Artificial intelligence -- Data Sources and Processing -- Population distribution and migration patterns -- Land use and land cover change detection -- Environmental risk assessment and climate change impacts -- Socioeconomic inequality and spatial analysis -- Health and disease mapping -- Smart cities and IoT integration -- Transportation and traffic management -- Urban growth and sprawl prediction -- Housing, affordability, and real estate market analysis -- Sustainable development and resource management -- Ethical Considerations and Challenges -- Conclusion and Future Prospects.
Sommario/riassunto	This groundbreaking book delves deep into the history of AI, the major techniques and algorithms of machine learning and deep learning, and the critical role of data sources and processing in these disciplines. It

covers a range of AI applications in human geography, including population distribution, land use, environmental risk assessment, and socioeconomic analysis. In urban planning, the book explores AI-driven approaches to smart cities, transportation management, urban growth prediction, and sustainable development, among others. As AI continues to permeate every aspect of human life, it is essential to understand and address the ethical considerations and challenges associated with AI-driven planning. This book tackles crucial issues such as data privacy, algorithmic bias, equitable access to technology, and the future of employment in the fields of geography and urban planning. In addition, it presents inspiring case studies, highlighting successful AI applications in human geography and urban planning, and offers insights into future research directions and challenges. This book is a must-read for students, researchers, and professionals in geography, urban planning, environmental studies, and related fields. It is also an invaluable resource for policymakers and urban planners seeking to leverage the power of AI to create smarter, more sustainable, and equitable cities and communities. This book equips you with the knowledge and tools to harness the potential of AI, leading the way to a better understanding of our world and a brighter future for all.
