

1. Record Nr.	UNINA9910970631203321
Autore	Pickard Alison Jane
Titolo	Research methods in information / / Alison Jane Pickard ; with contributions from Sue Childs [and others]
Pubbl/distr/stampa	London : , : Facet, , 2013
ISBN	9781783300235 178330023X 9781856048132
Edizione	[Second edition.]
Descrizione fisica	1 online resource (xxii, 361 pages) : digital, PDF file(s)
Disciplina	020.72
Soggetti	Information science - Research - Methodology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Jul 2018).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Setting the content -- The research hierarchy -- Overview of contents -- Part 1 Starting the research process -- Major research paradigms -- Introduction -- Positivist research -- Postpositivism and mixed methods research (MMR) -- Interpretivist research -- Qualitative or quantitative methodology? -- Qualitative research design -- Quantitative research design -- Mixed methods research -- Criteria for judging research -- Establishing trustworthiness in qualitative research -- Establishing rigour in quantitative research -- Summary -- Practical exercise -- Suggested further reading -- Reviewing literature -- Introduction -- Information searching and retrieval -- Evaluation -- Critical analysis -- Synthesizing the research: developing a theoretical framework -- Summary -- Practical exercise -- Suggested further reading -- Defining the research -- Introduction -- Designing a conceptual framework -- The research hypothesis -- Research aims and objectives -- Summary -- Practical exercise -- Suggested further reading -- The research proposal -- Why write a proposal? -- Structure of a research proposal -- The proposal as a research framework -- Summary -- Practical exercise -- Suggested further reading -- Sampling -- Why sample? -- Population and sample -- Probability sampling -- Purposive sampling -- Summary -- Practical exercise -- Suggested further reading -- Research data management -- Ethics in research --

Introduction -- Gaining access to the field -- Informed consent -- Anonymity and confidentiality? -- Protecting participants -- Ethics online -- Summary -- Practical exercise -- Suggested further reading.

Part 2 Research methods -- Case studies -- Introduction -- Phases in case study research -- Summary -- Practical exercise -- Suggested further reading -- Surveys -- Introduction -- Descriptive surveys -- Explanatory surveys -- The survey process -- Summary -- Practical exercise -- Suggested further reading -- Experimental research -- Introduction -- The nature of causality -- The true experiment -- Quasi-experimental design: the 'effects study' -- Summary -- Practical exercise -- Suggested further reading -- Usability testing -- Introduction -- Quasi experimental usability studies -- Cognitive walkthroughs -- Heuristic evaluation -- Ethnography -- Introduction -- Components of ethnographic study -- Virtual ethnography -- Ethics in ethnography -- Summary -- Practical exercise -- Suggested further reading -- Delphi study -- Introduction -- The Delphi process -- Rules of a Delphi study -- Modifying a Delphi study -- Delphi studies and new technologies -- Summary -- Practical exercise -- Suggested further reading -- Action research -- Introduction -- The action research cycle -- Trustworthiness in action research -- Action research as reflective practice -- Summary -- Practical exercise -- Suggested further reading -- Historical research -- Introduction -- The research process -- Summary -- Practical exercise -- Suggested further reading -- Grounded theory: method or analysis? -- Introduction -- Defining grounded theory -- Summary -- Practical exercise -- Suggested further reading.

Part 3 Data collection techniques -- Interviews -- Introduction -- What is the purpose of an interview? -- The seven stages of the interview process -- Online interviewing -- Summary -- Practical exercise -- Suggested further reading -- Questionnaires -- Introduction -- Designing questionnaires -- Developing questions -- Scale items -- Forms of questionnaire -- Summary -- Practical exercise -- Suggested further reading -- Observation -- Introduction -- The role of the observer -- Recording what you see: going with signposts -- Summary -- Practical exercise -- Suggested further reading -- Diaries -- Introduction -- The purpose of diaries in research -- Participant diaries -- The researcher's log -- Structure and recording -- Summary -- Practical exercise -- Suggested further reading -- Focus groups -- Introduction -- The purpose of a focus group -- Organizing a focus group -- Online focus groups -- Summary -- Practical exercise -- Suggested further reading -- Analysis of existing, externally created material -- The different supporting roles of documents -- LIS research principally based on documents -- Citation analysis -- Logs associated with computer software and the use of ICT.

Part 4 Data analysis and research presentation -- Qualitative analysis -- Introduction -- Phenomenological strategies -- Ethnographic methods -- Narrative and discourse analysis -- Constant comparative analysis -- Memo writing -- Presenting qualitative findings -- Software for qualitative analysis -- Summary -- Practical exercise -- Suggested further reading -- Quantitative analysis -- Introduction -- Levels of measurement -- Frequency distribution -- Cross-tabulation -- Measures of central tendency -- Measures of dispersion -- Correlation -- Displaying data -- Testing for statistical significance -- Software for quantitative analysis -- Summary -- Practical exercise -- Suggested further reading -- Presenting the research -- Introduction -- Planning the final report -- Form and structure -- Summary -- Suggested further reading -- Glossary and references.

handbook is fully updated and includes brand new coverage of online research methods and techniques, mixed methodology and qualitative analysis. This edition includes two new contributed chapters: Professor Julie McLeod, Sue Childs and Elizabeth Lomas focus on research data management, applying evidence from the recent JISC funded 'DATUM' project; Dr Andrew Shenton examines strategies for analysing existing documents.
