

1. Record Nr.	UNINA9910970634803321
Autore	Elder David E
Titolo	Atlas of dermatopathology : synopsis and atlas of Lever's histopathology of the skin // David E. Elder ... [et al.]
Pubbl/distr/stampa	Philadelphia, : Wolters Kluwer, 2021
ISBN	9781975124656 1975124650
Edizione	[4th ed.]
Descrizione fisica	1 online resource (1540 pages)
Disciplina	616.5
Soggetti	Skin Diseases - pathology Skin Diseases - diagnosis Skin - pathology Skin - Diseases Skin - Diseases - Diagnosis Atlas
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Preceded by Atlas and synopsis of Lever's histopathology of the skin / David E. Elder ... [et al.]. 3rd ed. c2013.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Disorders Mostly Limited to the Epidermis and Stratum Corneum -- Localized Superficial Epidermal or Melanocytic Proliferations -- Disorders of the Superficial Cutaneous Reactive Unit -- Acantholytic, Vesicular, and Pustular Disorders -- Perivascular, Diffuse, and Granulomatous Infiltrates of the Reticular Dermis -- Tumors and Cysts of the Dermis & Subcutis -- Inflammatory and Other Benign Disorders of Skin Appendages -- Disorders of the Subcutis.
Sommario/riassunto	"In this new edition, as in its predecessors, we have extensively updated the text, based on review of the recent literature, and also on material from the latest (11th) edition of Lever's Histopathology of the Skin. We have added more extensive discussion of several diseases that were either not covered or only briefly mentioned with little or no elaboration in the earlier editions, and have added current references to the literature. We have added multiple new images including clinical images of conditions that were not formerly illustrated. These are original digital images of high quality. As in the last edition, the

histopathologic images have been prepared from digital slides and the quality is state of the art, especially noticeable in the low-power images. These images are to be provided online for the reader's convenience. We have continued the use of arrows and labels on the photomicrographs, adapted from the style used in Sara Edward's excellent book *Essential Dermatopathology*. In addition, we have continued the practice of using tables to summarize the most salient diagnostic features of potential "look-alike" diseases"--
