Sommario/riassunto	This book critically examines the role of international financial organizations, such as the World Bank and the International Monetary Fund, in perpetuating poverty in Third World countries. Authored by James and Lance Morcan, it explores the hidden agendas behind financial aid, arguing that these institutions often act not out of altruism but to entrap nations in debt. Through a detailed analysis, the authors reveal how these organizations exploit the mineral wealth of poorer nations under the guise of financial assistance, leading to economic domination. The book aims to challenge the perception of charitable aid and to expose the systemic corruption that undermines genuine development efforts. It is intended for readers interested in geopolitics, economics, and social justice.
