1. Record Nr. UNINA9910970869503321

Autore	Small Michael
Titolo	Dynamics of biological systems / / by Michael Small
Pubbl/distr/stampa	Boca Raton, FL : , : Chapman and Hall/CRC, an imprint of Taylor and Francis, , 2011
ISBN	9781040160947 1040160948 9780429086212 0429086210 9781439897065 1439897069
Edizione	[First edition.]
Descrizione fisica	1 online resource (286 p.)
Collana	Chapman & Hall/CRC Mathematical and Computational Biology Series A Chapman & Hall Book
Disciplina	570.1/5118
Soggetti	Biological systems - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Contents; Preface; Chapter 1. Biological Systems and Dynamics; Chapter 2. Population Dynamics of a Single Species; Chapter 3. Observability of Dynamic Variables; Chapter 4. Biomedical Signal Processing; Chapter 5. Computational Neurophysiology; Chapter 6. Mathematical Neurodynamics; Chapter 7. Population Dynamics; Chapter 8. Action, Reaction and Diffusion; Chapter 9. Autonomous Agents; Chapter 10. Complex Networks; Chapter 11. Conclusion; Bibliography; Index; Back Cover
Sommario/riassunto	From the spontaneous rapid firing of cortical neurons to the spatial diffusion of disease epidemics, biological systems exhibit rich dynamic behaviour over a vast range of time and space scales. Unifying many of these diverse phenomena, Dynamics of Biological Systems provides the computational and mathematical platform from which to understand the underlying processes of the phenomena.
